Web Programming Technologies

Total: 15 Marks

Website Design: *Online Exam and Result Management System*

Description:
Create a portal for conducting online exams, managing student registrations, grading exams, and displaying results. Students should be able to register for exams, attempt them, and view results.

Requirements

1. **Technologies**: HTML, CSS, Bootstrap, JavaScript
2. **Pages and Layout**
   - **Home**: Introduction to the exam portal with registration options.
   - **Exam Registration**: Form for students to register for exams.
   - **Exam Interface**: Page for attempting exams with timer functionality.
   - **Results**: Display exam scores and results summary.
   - **Contact Us**: For inquiries and support.
   - **Sign Up/Sign In**: Student registration and login functionality.
   - **Responsive Design**: Ensure responsiveness across devices using CSS/Bootstrap.
3. **CRUD Operations**
   - **Create**: Register students for exams and save responses.
   - **Read**: Display registered exams, questions, and results.
   - **Update**: Allow students to edit personal details.
   - **Delete**: Enable students to withdraw exam registration if needed.

Note: The listed requirements are mandatory, including automated grading and validations wherever required. Extra marks for any unique functionality. Full creative freedom.
